

# JoikuSpot Premium Edition, Secure WLAN (Wi-Fi) HotSpot for Mobile Phones, unveiled today

## Press release

08/07/2008, Garden City, Finland

Joikusoft Oy Ltd. today announces JoikuSpot Premium Edition, an operator grade secure mobile software solution that turns S60 mobile phones instantly to mobile WLAN (Wi-Fi) HotSpots.

As an introductory offering, JoikuSpot Premium is offered for a limited time period with 40% discount of retail price exclusively from brand new [www.joikushop.com](http://www.joikushop.com).

According to the Joikusoft Chairman and Founder **Mr. Tom Ojala** "*Premium Edition represents a major milestone in our roadmap. Premium will bring a long awaited corporate intraweb (VPN) and email protocol support to the JoikuSpot software allowing business level use of the solution.*"

JoikuSpot installs directly to a mobile phone and allows the phone to share it's 3G internet connection wirelessly over WLAN with a laptop, iPod, iTouch, EeePC or Nokia internet tablet. Multiple devices can be connected to a JoikuSpot in parallel and seamlessly share the same 3G internet connection.

JoikuSpot Premium is fully secure and makes use of the maximum security offered by the underlying powerful Symbian OS platform. The users have full control over who gets to use their JoikuSpot internet access.

JoikuSpot Premium is open for commercial licencing toward Operators, OEMs and Corporates, and is fully customizable for the licensee branding and feature configuration needs. More information for licencing and whitelabeling options at [www.joikusoft.com](http://www.joikusoft.com).

In parallel to the launch of JoikuSpot Premium, Joikusoft today opens the door to a new web service called **JoikuShop** at [www.joikushop.com](http://www.joikushop.com). JoikuShop is an online webshop with premium quality commercial mobile software titles from industry leading software companies, supporting any mobile phone models.

*"We are excited about having both commercial ([www.joikushop.com](http://www.joikushop.com)) and freeware online communities ([www.joiku.com](http://www.joiku.com)) under Joiku product portfolio", says Tom Ojala. "By offering both, we can serve the Joiku users to the maximum with premium quality mobile software".*

## About Joikusoft

Joikusoft is a software development house focusing on mobile innovation. The Joiku mission is to liberate the mobile internet with mobile WLAN (Wi-Fi) HotSpots. User base of JoikuSpot exceeded 200.000 in May 2008 and grows exponentially. Joikusoft was the first in the world to roll out a mobile Wi-Fi HotSpot solution for S60. Joikusoft is a privately held company, founded in 2007 in Finland and has headquarters in Garden City, Espoo, Finland.
